PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with hands-on experience designing and building scalable web applications using the MEARN stack (MongoDB, Express.js, Angular, React.js, Node.js). Proficient in RESTful API development, WebSocket-based real-time features, JWT authentication, and role-based access control (RBAC). Experienced in Agile team environments with a strong focus on clean, maintainable, and well-documented code. Passionate about continuous learning and delivering user-focused digital products.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, Next.js, Angular, Node.js, Express.js, Nest.js

Real-Time & APIs: WebSocket, Socket.IO, RESTful APIs, API Integration

Authentication & Security: JWT, Authentication & Authorization, Role-Based Access Control (RBAC)

Databases: MongoDB, Mongoose

Tools & Deployment: Git, GitHub, Netlify, npm, Agile/Scrum, vercel

EXPERIENCE

Full-Stack Web Development Intern – MEARN Track

Jul 2025 – Jan 2026

- Built and deployed full-stack web applications using MongoDB, Express.js, Angular, React.js, and Node.js across multiple real-world projects
- Designed and implemented RESTful APIs with Express.js, including authentication and authorization flows using JWT
- Integrated WebSocket connections to support real-time data features within application workflows
- Collaborated in cross-functional Agile teams, applying Git-based version control and participating in sprint planning and code reviews
- Applied software engineering best practices: modular component design, reusable code, and clean architecture patterns

Graduation Project: ITI HUB – Social Media Platform

- Developed a feature-rich social media platform using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Implemented multi-role access control system (Admin, Instructor, Student) with JWT-based authentication and authorization
- Designed and built RESTful APIs, integrated frontend and backend with real-time post, comment, and community interaction features
- Followed Agile development practices with Git version control and GitHub collaboration

PROJECTS

Al Naqaa (النقاء) – Pest Control Business Website | Next.js, SEO, Netlify

- Built and deployed a business website for a pest control company targeting the Kuwaiti market
- Implemented a full SEO setup: Google Search Console integration, Local Business schema, hreflang tags, and an Arabic keyword strategy
- Hosted on Netlify with a custom domain, including ongoing geo-targeting optimization for the Kuwaiti market

Demo: elnqaa-kw.com

NET-FILMS – Movie Browsing Platform | React.js, Redux, JavaScript, REST API

- Built a dynamic movie browsing platform with real-time data fetched from the TMDB API
- Implemented global state management using Redux and developed reusable, modular React components
- Delivered responsive UI with smooth user experience across devices

Demo: [NET-FILMS](#) | GitHub: [NET-FILMS](#)

Play Blocks – Games Browsing Website | HTML5, CSS3, JavaScript

- Designed and developed a responsive games browsing website with clean UI and dynamic JavaScript interactions
- Applied mobile-first design principles and accessible markup
